

DOUBLE POWER RACK ASSEMBLY

SINGLE POST & DOUBLE POST

Before assembling this rack:

Consider how much space will be required around the unit to access weights and not interfere with other equipment.

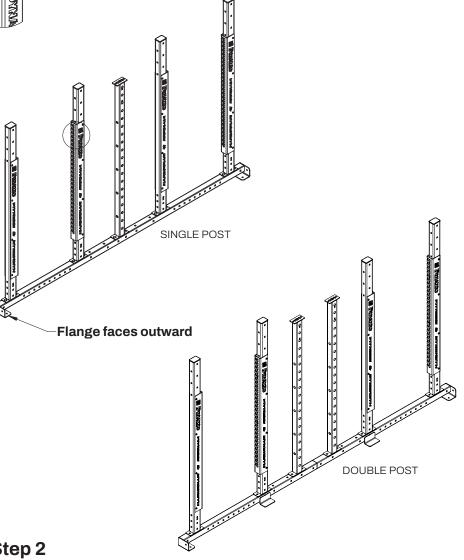

Step 1

Attach storage post to base as shown using carriage bolts. Install bolts into storage post flange and then through base tube. Bolt head on top of flange with nut mounted under base tube. To ease assembly lay the rack components out horizontally on the floor. Repeat for left side.

Step 2

Attach working uprights to right base as shown. ULTRA PRO[®] will mount at first location from end of base tube, TITAN G2 will mount at second location. Repeat on left side.

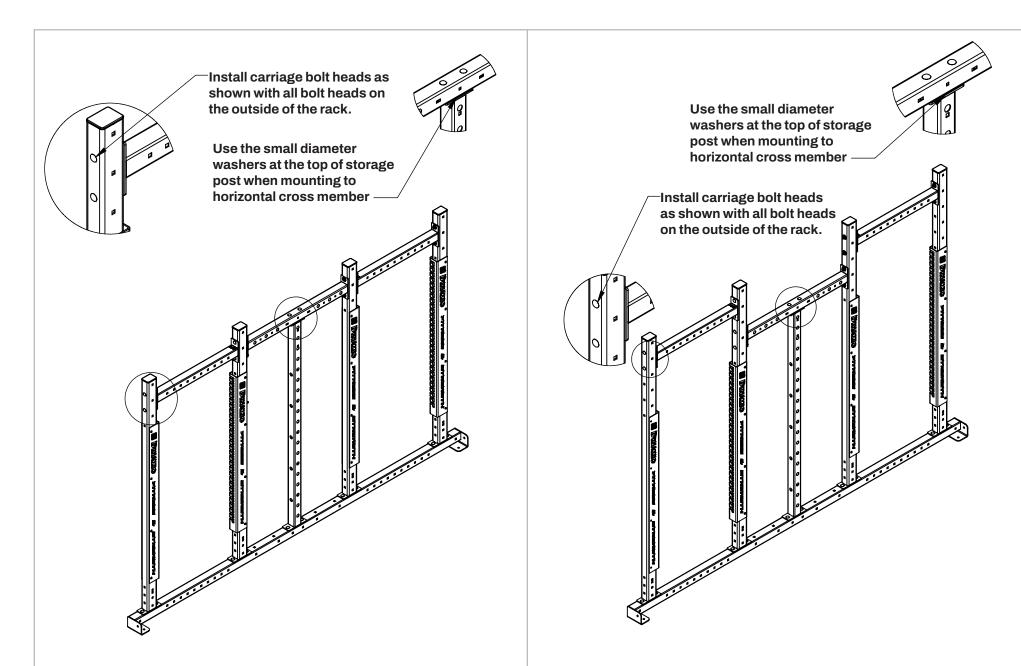

The mounting access for bar catch

and safety must be to inside of rack

Note: TITAN G2 Series will not

have an upright wrap as shown.

as shown.

Step 3 A

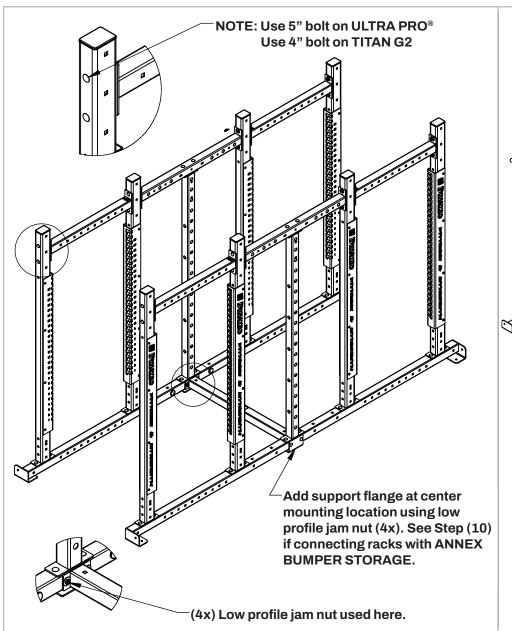

Attach horizontal cross members to storage posts and 8' front uprights. Repeat for left side.

Note: Use small diameter washers at top plate when mounting storage post to horizontal.

Step 3 B

Attach horizontal cross members to storage posts and 9' front uprights. Repeat for left side.

Note: Use small diameter washers at top plate when mounting storage post to horizontal.

SINGLE POST DOUBLE POST

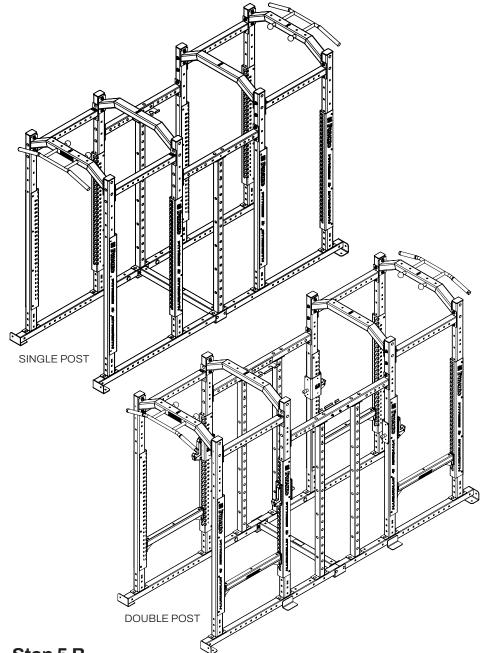

Step 4

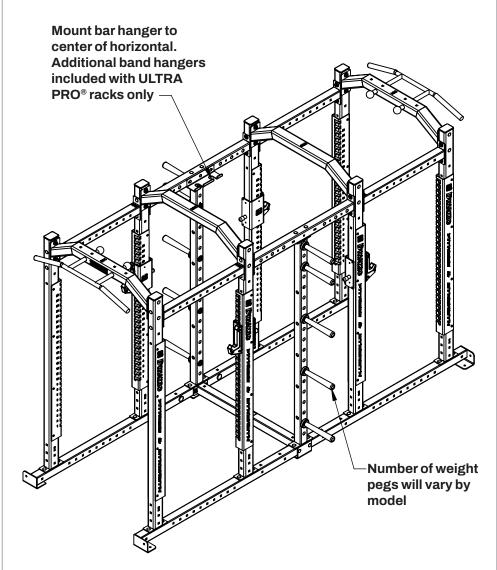

Attach right half to left half as shown using horizontal base tube and center mounting flanges.

Note: The carriage bolt heads on outside of rack with low profile jam nut on inside

Step 5 A

Attach horizontal chin up bars between left and right 8' uprights as shown. This bar may vary based on your model. Note: This step requires two people to lift and fasten.

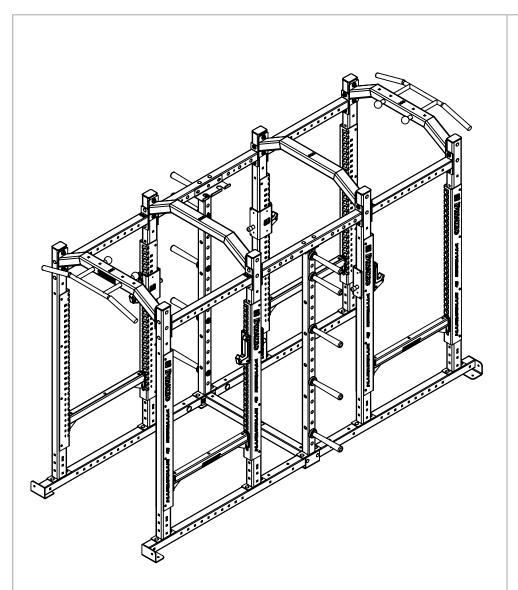

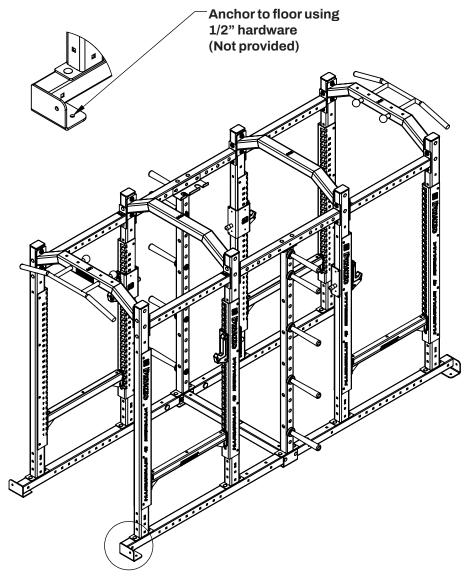

Step 5 B

Attach horizontal chin up bars between left and right 9' uprights as shown. This bar may vary based on your model. Note: This step requires two people to lift and fasten.

Step 6

Mount weight pegs in desired locations. The recommended spacing between each peg is (4) holes as shown. Install bar hangers and optional band storage hooks.

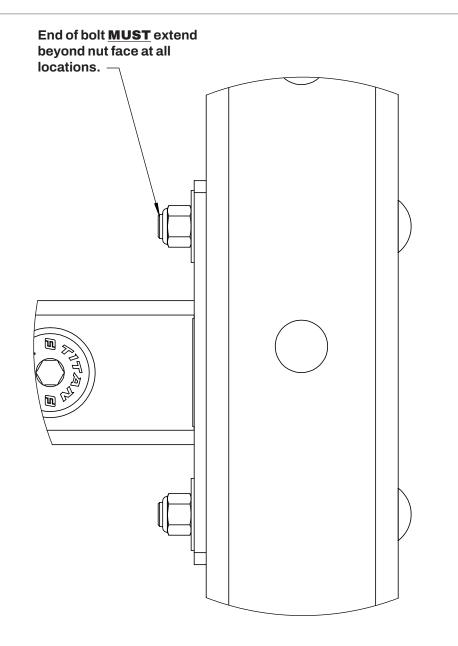

Step 7

Mount bar catch and safety assemblies to rack at desired location.

Step 8

Position rack in final location and anchor to floor using available holes on each base.

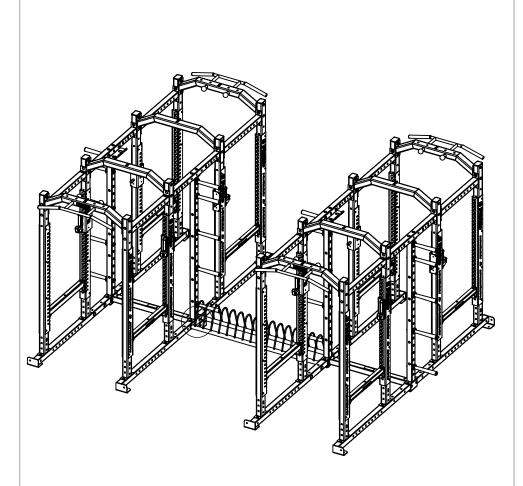

Step 9

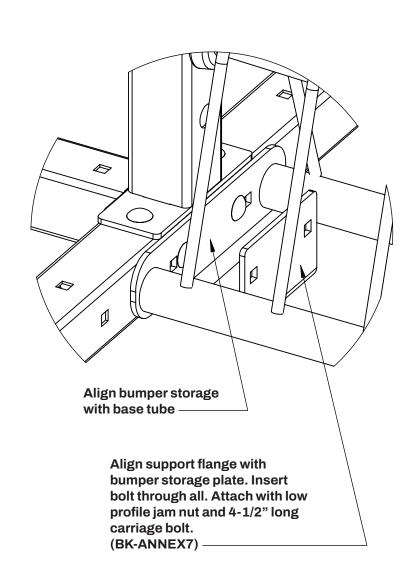

Tighten each hardware connection. The end of each bolt should extend beyond nylock nut face as shown. **DO NOT COLLAPSE TUBING FROM OVER TIGHTENING HARDWARE.**

Maintenance

Preventative actions will keep your facility safe and productive for all users

- 1) Wipe Down Equipment Use gneral purpose cleaner. Avoid Bleach based solutions.
- 2) Lubricate All Moving Parts Use a silicone spray and clean rag to apply.
- 3) Tighten All Hardware Inspect the condition of all hardware and tighten loose fasteners.
- 4) Inspect Wear Guards To prevent metal to metal contact with components keep wear surfaces protected.
- 5) Replace All Worn Parts

Step 10 (Optional)

Connecting Bumper Annex storage to single post rack center base support mounts inside storage rack, with flange facing inward.
